NeoCyber™ IPS Services

Enable more effective operation of your Intrusion Prevention System (IPS) by using our team of cyber security experts to manage the maintenance, administration and monitoring of your IPS device to achieve another layer of powerful security. Or if you just need monitoring, we can do that too.

Neovera provides dedicated 24x7 IPS management and/or monitoring services to ensure the security of your organization's network. Our NeoCyber IPS Services offering delivers enterprise grade security to customers that may not have the resources of a full IT staff.

Neovera's cyber security services easily integrate powerful security components to provide the data protection your business needs. With our IPS services, Neovera delivers in-line protection from malicious exploits, malware, SQL injections, and ransomware attacks. Bottom line: We protect your business from cyber attacks.
